MINI FOOTPRINTS BUSINESS PLAN

Business Name: Mini Footprints
Business Type: SaaS-Based Baby Party Shoe E-com Platform
Business Model: Commercial sales of baby party shoes
Products: Babyshoes specifically designed for parties, events, and special occasions.
Target Market: Parents (especially mothers) of children aged 0-5 years looking for stylish, comfortable, and affordable party shoes for their babies.
Mission: To provide high-quality, stylish, and comfortable baby party shoes for special occasions while offering an exceptional onlineshopping experience.
Vision Statement: To become Nepal’s leading online destination for baby party shoes, known for our product range, quality, and customer satisfaction.

Business Overview:

Mini Footprints is an e-commerce platform dedicated to providing stylish, comfortable, and high-quality baby party shoes for parents in Nepal. Our mission is to offer affordable luxury by combining the elegance of highquality footwear with the comfort that babies need for special occasions. Whether it’s a wedding, birthday, family gathering, or festive celebration, we provide the perfect shoes for little ones to shine.

At Mini Footprints, we aim to provide a seamless, user-friendly shopping experience, ensuring that parents can easily browse, order, and have their baby shoes delivered straight to their doorsteps. Our online store is optimized for mobile and desktop use, making it accessible for parents across Nepal.

BUSINESS MODEL CANVAS TABLE

The business model canvas table plan provides a roadmap for building a successful e-commerce business focused on baby party shoes in Nepal. It highlights the key partners, activities, resources, value propositions, customer relationships, channels, customer segments, and cost structures that will drive the business. The model emphasizes building a strong online presence, leveraging social media, and ensuring customer satisfaction through personalized services and a robust logistics network.

Section	Description
1. Customer Segments	- Parents of infants and toddlers looking for party shoes - Gift buyers for baby birthdays, christenings, or special events - Event planners and photographers who recommend baby accessories - Relatives or friends shopping for baby presents

2. Value Propositions	• Stylish, comfortable, and safe party shoes for babies • Easy and convenient online shopping experience for parents • Variety in designs, sizes, and seasonal collections • Affordable pricing with occasional discounts
3. Channels	• Mini Footprints' official e-commerce website • Social media platforms (Instagram, Facebook, TikTok) for promotions • Email newsletters for discounts and product launches • Blanxer SMS for order updates and flash sales
4. Customer Relationships	• Personalized recommendations based on past purchases • Prompt responses to queries via email, chat, or Blanxer SMS • Loyalty discounts for repeat buyers • Engaging with customers on social media platforms
5. Revenue Streams	• Direct sales of baby party shoes via the e-commerce store • Seasonal sales and exclusive product launches • Bundle offers (e.g., two pairs at a discounted price) • Gift cards for customers to purchase for others
6. Key Resources	• Blanxer-powered e-commerce store backend • Product inventory (baby party shoes in various sizes and designs) • Brand identity and logo • Skilled staff for order processing and customer service

7. Key Activities	• Designing, listing, and updating product catalogs • Managing online orders and customer inquiries
	• Running promotional campaigns and discounts • Maintaining inventory and stock levels
8. Key Partnerships	• Blanxer CMS platform for store creation and management • Shoe manufacturers and suppliers specializing in baby footwear • Delivery and courier services for order fulfillment • Payment gateway providers (e.g., mobile wallets, credit card processors) • Photographers for product images • Packaging suppliers for premium and eco-friendly shoe boxes
9. Cost Structure	• Manufacturing or wholesale purchase cost of shoes • Shipping and logistics expenses • Website hosting and Blanxer subscription fees • Marketing and advertising costs

BUSINESS MODEL CANVAS & PLAN

1. Customer Segments

For our baby shoe store, our primary segments are parents (mostly mothers) of children aged 0-5 years who are looking for stylish and comfortable shoes for special events like parties, weddings, or holidays. These parents are typically middle to upper-income individuals who prioritize quality and personalization. Identifying these segments helps us tailor our product offerings, marketing strategies, and sales efforts to meet their needs effectively.

2. Value Propositions

For our baby shoe e-commerce store, our value proposition lies in offering high-quality shoes specifically designed for special occasions. These shoes provide comfort, numerous options and elegance which appeal to parents looking for premium, unique footwear for their children's memorable events. By emphasizing both quality and personalization, we differentiate our brand in the marketplace.

3. Channels

Channels include both online and offline methods. For our e-commerce store, the primary channel

is our website, where customers can browse and purchase products. Additionally, social media platforms like Instagram and Facebook serve as marketing channels to engage with potential customers and build brand awareness. Influencer partnerships or pop-up events may also serve as supplementary channels to reach a wider audience.

4. Customer Relationships

Customer Relationships for our website includes offering personalized customer support (through live chat or email), providing post-purchase follow-up for feedback, and offering a loyalty program to reward repeat customers. By creating a strong emotional connection with our customers, we ensure they return for future purchases and share their positive experiences with others.

5. Revenue Streams

Our main revenue stream describes the various ways our business generates income. For our website, the primary revenue stream is the direct sale of baby shoes through our e-commerce platform. Limited edition releases offer premium products at a higher price point, and affiliate marketing or partnerships with influencers may provide additional revenue. Identifying diverse revenue streams helps ensure financial stability and long-term sustainability for our business.

6. Key Resources

In our case, the key resources include the technology infrastructure. The product inventory (baby shoes), human resources (the team running the business), and financial capital for operations and growth. These resources are essential to ensure we can offer quality products, deliver excellent customer service, and grow our business.

7. Key Activities

For our business, this includes sourcing high-quality baby shoes, managing inventory, executing digital marketing campaigns, handling customer inquiries, processing orders, and ensuring timely deliveries. These activities are essential to maintaining customer satisfaction, building brand awareness, and ensuring smooth business operations.

8. Key Partnerships

For our baby shoe e-commerce store, this includes suppliers and manufacturers who provide the shoes, logistics partners who handle delivery, and payment processors for seamless transactions.

Building strong partnerships helps us focus on our core business while leveraging the expertise and resources of others to ensure smooth operations and growth.

9. Cost Structure

Under the cost structure, the fixed costs include website development and hosting, employee salaries, and any office space if applicable. Variable costs include product procurement (buying the shoes), shipping fees, packaging, marketing, and advertising. Understanding the cost structure helps us manage cash flow, optimize operations, and ensure profitability by balancing income and expenditures.

Welcome to the Mini Footprints- Where Every Tiny Step Makes A Big Memory

At our store, we believe every little step your baby takes is a special moment worth celebrating. Whether it's a first birthday, a family gathering, or a holiday event, our mission is to provide **premium baby party shoes** that combine comfort, safety, and style for these unforgettable occasions.

Our collection is thoughtfully crafted with soft, baby-safe materials and features non-slip soles to support your child's growing feet while keeping them comfortable and secure. Designed for both boys and girls, our shoes range from delicate bows and sparkles to bold patterns and colors, making it easy to find the perfect pair for any celebration.

We understand how meaningful these early milestones are, which is why we focus on quality and timeless design. Adding a touch of magic to your child's special day. Beyond just shoes, we aim to be part of your family's joyful memories, trusted and little ones love to wear.

Thank you for choosing Mini Footprints—where every tiny step makes a big memory.

Celebrating tiny toes and big smiles — one cute step at a time.

Tracks and reports website traffic

How google analytics can help your business?

Website Traffic Analysis: It provides data on the number of visitors to your website, where they are coming from, and how they interact with your site.

Audience Insights: Google Analytics provides a wealth of information on your target audience, including demographics, interests, location, and behavior patterns.

Conversion Tracking: You can track the performance of your website and identify areas that need improvement to increase conversions, such as calls to action, landing pages, and checkout processes.

ROI Calculation: You can track the return on investment of your online marketing campaigns and determine which channels are most effective.

Content Optimization: You can see which pages on your site are most popular and use that information to make informed decisions about which content to keep, update, or remove.

Mobile Analytics: You can see how visitors are accessing your site on different devices and optimize your site accordingly.

Real-Time Monitoring: You can see what's happening on your site in real-time and make adjustments quickly to improve the user experience.

BLANXER ADMIN PANEL FEATURES

Mini Footprints uses the Blanxer eCommerce SaaS platform in order to manage the sales of baby party shoes. The Blanxer-powered admin dashboard has streamlined Mini Footprints' e-commerce operations by bringing every essential management tool into one intuitive interface. From product listings to customer communications, each feature works in harmony to simplify workflows, improve customer satisfaction, and support the brand's growth in the niche baby party shoe market. This integration has allowed even non-technical staff to manage, customize, and scale the store efficiently, ensuring Mini Footprints remains both agile and competitive.

Here, each and every feature is described below in detail:

1. Home

The Home section of the admin dashboard acts as the central control panel, giving Mini Footprints a quick snapshot of store performance, such as sales trends, recent orders, and inventory updates. This centralized view allows the business to track daily operations efficiently, spot emerging patterns in customer behavior, and make timely decisions on stock replenishment for high-demand baby party shoes. By consolidating the most important KPIs in one place, it ensures the store remains agile and customer-focused.

2. Store Users

The Store Users feature allows Mini Footprints to manage admin and staff accounts with role-based permissions. For example, a marketing team member might have access to product descriptions and discount settings, while a logistics person can manage orders and shipping statuses. This ensures tasks are delegated securely and efficiently, keeping operations smooth even when multiple people are working behind the scenes.

3. Categories

Categories help organize the store's products into clear, searchable sections—such as "Infant Party Shoes," "Toddler Party Shoes," or "Seasonal Specials." This not only makes it easier for customers to browse and find products but also enhances SEO performance, driving more organic traffic to the store. A well-structured category system reflects Mini Footprints' focus on convenience and style for parents shopping for their little ones.

4. Products

The Products section is the backbone of the store, allowing Mini Footprints to add, update, and manage detailed listings for each shoe, including sizes, colors, pricing, and availability. With high-quality photos and accurate descriptions, the store can convey the elegance and comfort of

its baby party shoes, ensuring customers have all the information they need to make confident purchases.

5. Customers

This feature stores customer profiles, order history, and contact information, enabling personalized communication and loyalty-building efforts. For Mini Footprints, it's an opportunity to send targeted promotions—such as discounts for a child's upcoming birthday or reminders for seasonal shoe collections—strengthening customer relationships and encouraging repeat purchases.

6. Orders

The Orders section manages all transactions from purchase to delivery, including order statuses, payment confirmations, and shipment tracking. For Mini Footprints, this ensures that every order for baby party shoes is processed smoothly, reducing errors, delays, and customer complaints, while also providing a clear record for returns or exchanges.

7. Issues

This feature tracks customer-reported problems, such as defective items, wrong sizes, or delivery delays. For Mini Footprints, a structured issues log allows quick resolution, improving customer satisfaction and reinforcing trust in the brand. By identifying recurring problems, the store can also improve quality control and supplier reliability.

8. Blanxer SMS

Blanxer SMS integrates direct messaging into the store's workflow, enabling Mini Footprints to send order confirmations, shipping updates, and promotional alerts directly to customers' phones. This fast, personal communication builds customer confidence and ensures buyers remain informed and engaged throughout their shopping journey.

9. Discount Coupons

Discount Coupons allow the creation of promotional codes for seasonal sales, new product launches, or special events. Mini Footprints can use them to attract first-time buyers or reward loyal customers—such as offering a “10% off first purchase” deal—helping to boost sales volume and brand loyalty.

10. Analytics

Analytics provides detailed insights into store performance, customer behavior, and sales trends. For Mini Footprints, these reports can reveal best-selling shoe styles, popular price ranges, or peak shopping times, enabling smarter inventory planning and targeted marketing campaigns.

11. Media

The Media library stores all product images, banners, and marketing visuals. High-quality photography is critical for Mini Footprints, as parents buying baby party shoes rely heavily on visuals to assess design and quality. A well-organized media library makes it easy to update seasonal collections or refresh product galleries.

12. Transactions

Transactions keep a detailed record of all financial movements, including sales, refunds, and payment processing fees. For Mini Footprints, this ensures transparency in revenue tracking, facilitates smooth bookkeeping, and supports compliance with accounting standards.

13. Pages

The Pages section allows the creation and customization of static pages like “About Us,” “Size Guide,” “Care Instructions,” and “Contact.” These pages help tell the Mini Footprints brand story, provide valuable shoe-care advice, and make the store feel more trustworthy and customerfriendly.

14. Plugins

Plugins extend the store’s functionality by adding extra features like advanced search, product reviews, or shipping calculators. For Mini Footprints, carefully selected plugins can enhance customer experience without requiring deep technical skills, aligning perfectly with the Blanxer CMS model.

15. Appearance

Appearance settings allow full control over the store’s look and feel, from themes and colors to fonts and layouts. This enables Mini Footprints to maintain a polished, elegant aesthetic that reflects the charm and quality of its baby party shoe collection, making the store visually appealing and brand-consistent.

16. Store Setting

The Store Setting feature centralizes operational configurations, such as store name, currency, tax rules, and default shipping options. For Mini Footprints, this ensures all transactions and displays align with the target market’s preferences and regulations, reducing errors and improving customer trust.

17. Payment Setting

Payment Setting allows integration with secure payment gateways, enabling customers to pay via credit card, mobile wallets, or bank transfer. Offering multiple payment options is essential for Mini Footprints to accommodate different customer preferences and boost checkout conversion rates.

18. Help

The Help section provides documentation, tutorials, and direct support from Blanxer. For Mini Footprints, this means even a non-technical store owner can troubleshoot issues, learn best practices, and fully leverage the CMS to grow the baby party shoes business without external dependency.

BLANXER FEATURE COMPARISON TABLE

Feature	Basic (15-day trial)	Premium (Full access + 15-day trial)	Platinum(For Heavy Operations)

SEO Tools	Page-level SEO settings (title, meta description, image)	Advanced SEO settings (schema markup, redirect manager)	All Premium + dynamic sitemap, multilingual SEO
Support	Community support & email support	Priority support via email & chat	Dedicated account manager & 24/7 support

PLUGINS USED

Plugin Name	Purpose / Use	Reason for Selection
Tawk.to (Chat Plugin)	Real-time customer support	Easy to integrate, enhances customer engagement and resolves queries instantly
Google Analytics	Track visitor behavior and traffic sources	Provides in-depth insights into user activity, helping refine marketing and UX strategies
Google Tag Manager	Manage and deploy tracking tags flexibly	Centralized tag management without needing to alter website code repeatedly
Blanxer Built-in SMS Tool	Send order status updates and promotional messages	Built-in tool makes it easy to automate order alerts and run basic SMS campaigns
eSewa Payment Gateway	Enable secure online payments	Locally popular gateway; trusted by users in Nepal for seamless transactions
Khalti Payment Gateway	Additional digital payment option	Widely used in Nepal; provides users with more flexibility in payment methods
Cash on Delivery (COD)	Offline payment option	Mandatory in Blanxer free tier; caters to users uncomfortable with online payments
CRM Dashboard (Blanxer Default)	Manage customer profiles, order history, and analytics	Helps improve customer relationships, tracks sales patterns, and boosts retention
SEO Settings (Built-in)	Manage meta tags, descriptions, and page SEO	Increases discoverability of site pages on search engines without third-party tools

CONCLUSION AND REFLECTION

Building an e-commerce website for baby party shoes using ‘Blanxer’ as part of this assignment has been an insightful and rewarding experience. From ideating the business model to implementing the technical and strategic aspects of the online store, this project offered hands-on exposure to what it takes to launch and operate a niche e-commerce business in a digital-first market like Nepal.

Throughout the process, I gained practical experience in designing a user-friendly website, organizing product listings, integrating payment and delivery systems, and creating a seamless customer journey. I also developed an understanding of how to apply key business concepts such as the Business Model Canvas, value proposition development, market segmentation, and cost-revenue structuring in a real-world context.

Working within a specialized market—baby party shoes—helped me appreciate the importance of identifying a unique value proposition and tailoring the online shopping experience to meet the emotional and practical needs of a very specific customer segment: parents of young children. It also underscored the value of customization and quality in today’s e-commerce space, especially for products meant for memorable family occasions.

This project not only enhanced my technical skills in using the ‘Blanxer’ platform but also deepened my understanding of digital business strategy, online branding, and customer engagement. Overall, it was a valuable learning experience that provided me with a foundational understanding of launching an online retail business and the challenges and opportunities that come with it. More importantly, it sparked a deeper interest in understanding how tech empowers entrepreneurship, and I’m excited to explore more of it in the upcoming labs.
